## SUMMARY

Frontend developer fresher with a strong grip on HTML, CSS, and JavaScript, focused on building clean, responsive, and user-friendly web interfaces. I've been learning by building real projects, improving my logic, and writing better-structured code. Currently looking for an entry-level frontend role where I can grow and contribute.

---

## PROJECTS

### Personal Portfolio Website

- Built my own portfolio website to showcase projects and skills
- Made the layout fully responsive for mobile, tablet, and desktop
- Focused on clean UI, simple navigation, and readable code

### Classic Snake Game

- A browser-based Snake game built with JavaScript.
- **Problem:** Handling movement and collisions often leads to messy logic.
- **Solution:** Implemented a clean game loop with predictable state updates and keyboard controls.

### Kanban Task Board

- A simple Kanban-style task manager for organizing work visually.
  - **Problem:** Task apps become hard to manage as tasks increase.
  - **Solution:** Built a Kanban board with structured DOM updates and clear event handling.
- 

## EDUCATION

Bachelor of Computer Applications

Aug 2022 - April 2025

---
